

Data Quality & Forensics Report

CredResolve — Data Analyst Assignment

Issue	Evidence	Treatment	Impact
Duplicate payments	972 duplicate rows; raw successful recovery 134.1B duplicate call_id; 13.65% of event key; never deduped. 250 call_id/1.68% available.	De-duplicate call_id; never deduped event key; never deduped.	Prevents call volume/contact inflation.
Duplicate calls	1,350 duplicate call_id rows; 11 duplicate IDs have conflicting timestamps per call_id; flag conflicts.	De-duplicate call_id; never deduped event key; never deduped.	Prevents call volume/contact inflation.
Campaign windows	80.3% of targeting rows are outside active campaign window.	De-duplicate call_id; never deduped event key; never deduped.	Campaign-level attribution is unreliable.
Timezone	66.7% of calls disagree with vendor timezone.	Retain raw timezone; canonicalize only after source reconciliation.	Reconciliation comparisons can be materially wrong.
Borrower master	19,585 duplicate borrower rows; 8,518 IDs have conflicting profile fields; 9.03% account relationship; 3.6% duplicate profile fields.	De-duplicate call_id; never deduped event key; never deduped.	De-duplicate call_id; never deduped event key; never deduped.
Agent master	All 30,000 agent IDs have multiple master rows; 1,000 share identical event keys; require effective-dated id.	De-duplicate call_id; never deduped event key; never deduped.	De-duplicate call_id; never deduped event key; never deduped.

Source-of-truth decisions

accounts.account_id is the canonical operational entity. Event-table borrower_id values are not allowed to override the account relationship. Successful recovery means payment_status=SUCCESS after exact event deduplication. Campaign/channel payment attribution uses the latest valid targeting event before payment within seven days; this strict attribution covers only 4.75% of clean successful recovery and is therefore directional.

Observation window

Targeting and payment data run through 2026-08-08; calls extend to 2026-08-12. August is partial, so Jan-Jul are the comparable full months.
